

Liverpool Pharmacokinetics Day

09:15am - 3:30pm, Tuesday 13th March 2012
Liverpool Medical Institution

Meeting aims

Pharmacokinetics is an important area of pharmacology, helping to understand what the body does to a drug and in combination with pharmacodynamics what the drug does to the body. The aim of the day is to highlight pharmacokinetic applications in paediatric medicines, dose estimation, the incorporation of genetic information in PK models and health economic models.

Audience

The day will be of interest to those working in the field of pharmacokinetics or with a general interest in pharmacology or pharmacokinetics.

Programme

Speakers include: Joshua Pink (Bangor University), Gareth Veal (Newcastle University), Ashley Strougo (Astelles Pharma Global Development Europe Division of Pharmacology), Geoff Tucker (University of Sheffield), Ben Francis (University of Liverpool), Julie Bertrand (University College London Genetics Institute), Thomas Jaki (Lancaster University)

Registration

Places are free but limited and must be reserved in advance. To reserve a place, please email nwhtmr@liv.ac.uk

Lunch and refreshments will be provided.
