### PHR programme long-term conditions in children and young people themed call webinar

The PHR Programme is participating in the National Institute for Health Research (NIHR) themed call for evaluative research for long-term conditions in children and young people.

The research should aim to provide the evidence base to improve the health outcomes for children and young people that result from long-term conditions. The call is in support of the annual report of the Chief Medical Officer 2012 entitled “Our Children Deserve Better: Prevention Pays”.

To support applications to the PHR Programme in response to the NIHR this Themed Call, PHR will be running a webinar on 1 April 10.30 am. To register for the webinar complete the [application form](#) by 21 March 2014. The webinar will cover the background to the themed call, answer remit queries and highlight commonly made mistakes when applying for funding.

For further details about this themed call and other participating NIHR programmes visit the [themed call website here](#).
