Social care research information event 2020

15 December 2020, 2.00 pm to 3.30 pm, online event.

If you are a social care researcher, manager, voluntary organisation, charity or third sector organisation and want to find out more about social care research, this online event is for you.

This event will showcase starting a career in social care research and the support available. It will also help identify the challenges to undertaking social care research.

[Registration and further information about this event, including agenda is available here.](#)

Nursing and Midwifery Research Careers Advisory Service

Do you want to take a first step into an academic research career as a nurse or midwife?

Do you want a role where you can continue to work clinically as well as pursue your own academic work?

If you have already started your clinical academic career would you like the opportunity to explore how to make your next move along the clinical academic career pathway?

Would knowing how to apply for and increase your chances of successfully securing NIHR research fellowship funding help?

A Nursing and Midwifery Research Careers Advisory Service is being piloted in three Research Design Service regions:

- North West
- East Midlands
- South East

[Find out more and access the advisory service here.](#)

Events and webinars

[NIHR Academy Members' Conference 2020](#)

24 November 2020 - Online - also open to non-Academy members.

[How to apply to the first Global Health Research Centres funding call webinar](#)

25 November 2020 - Online.

[Designing health research using routine data webinar](#)

7 December 2020 - Online.

Check with event organiser/funder for latest information.

RDS Blog: Using health and social care data for research

Routinely collected data contain large quantities of health and social care information, usually covering whole populations and often spanning prolonged time periods. Such data can be repurposed and underpin new research whilst reducing costs, time and resources.

Until recently accessing this data has been a big challenge, but joint efforts are underway to improve this.

Find out more in the [November RDS blog](#).

It is World Antimicrobial Awareness Week

Antimicrobial resistance (AMR) is one of the biggest global health threats we face. AMR infections are estimated to cause 700,000 deaths each year globally.

The NIHR's [Tackling AMR campaign](#) highlights the role research has to play in combating the AMR threat and how the NIHR can support researchers, life science industry and other key players to tackle antimicrobial resistance.
