Early Contact and Engagement with Researchers (ECER)

We can help you to make the greatest impact from the delivery of your study if you engage with us as early as possible - even if you haven't secured funding for your research yet.

Through accessing support from the Early Contact and Engagement Team, you will benefit from a bespoke service to meet the needs of your study. This may involve:

- Eligibility advice
- Regulatory submissions
- Assistance with costing your study
- Exploration of recruitment pathways
- Local intelligence to optimise delivery

This service is designed to complement the support already provided by individual R&D offices

CRN Support

The NIHR has established a network of AcoRD specialists based in each Local CRN to:

- Signpost researchers to resources and training to understand the principles of AcoRD
- Provide specialist advice and support for activity attribution
- Validation of SoECATs
